Executive Summary	EX-1
Chapter 1—Introduction	1-1
1.1 Integrated Pest Management Plan	1-1
1.1.1 Scope.....	1-1
1.1.2 Authority	1-1
1.1.3 Purpose and Structure	1-1
1.1.4 Integrated Pest Management Plan Implementation	1-2
1.1.5 Integrated Pest Management Plan Maintenance	1-2
1.2 Installation Background.....	1-3
1.2.1 Mission.....	1-3
1.2.2 Location and Facilities.....	1-3
1.2.3 Overview.....	1-4
1.2.4 Pest Management Objectives	1-5
1.2.5 Program Requirements.....	1-6
Chapter 2—Program Administration.....	2-1
2.1 Roles and Responsibilities	2-1
2.1.1 Commanding Officer	2-1
2.1.2 Integrated Pest Management Coordinator	2-1
2.1.3 Environmental Compliance and Protection Department	2-2
2.1.4 Facilities Department, Maintenance Branch, Pest Control.....	2-2
2.1.5 Marine Corps Community Services.....	2-3
2.1.6 Naval Facilities Engineering Command, Hawaii, Facilities Support Contracts	2-3
2.1.7 Naval Facilities Engineering Command, Hawaii, Pest Control.....	2-4
2.1.8 Preventive Medicine	2-4
2.1.9 Contract Pest Management Service Providers.....	2-4
2.2 Pesticide Approval	2-5
2.3 Records and Reporting.....	2-6
2.3.1 Pest Management Record Keeping.....	2-6
2.3.2 Maintaining Pest Management Operations Records.....	2-6
2.3.3 Pest Management Service Provider Reporting Procedures	2-7
2.4 Training, Certification, and Licensing.....	2-7
2.4.1 General Requirements.....	2-7
2.4.2 Verification of Qualifications	2-7
2.4.3 Requirements for Department of Defense Pesticide Applicators	2-8
2.4.4 Requirements for Commercial Contract Applicators	2-8
2.4.5 Requirements for Natural Resource Management Applicators	2-8

2.4.6	Requirements for Performance Assessment Representatives/Quality Assurance Evaluators	2-8
2.4.7	Requirements for Integrated Pest Management Coordinators and Environmental Personnel	2-9
2.5	Pest Management Contracting	2-9
2.5.1	Current Pest Management Contracts	2-9
2.5.2	Contract Specifications and Review	2-9
2.5.3	Government Representatives	2-10
2.5.4	Contract Requirements.....	2-10
2.5.5	Contract Performance Assessment	2-11
Chapter 3	—Operations	3-1
3.1	Integrated Pest Management.....	3-1
3.1.1	Federal Regulation and Policy	3-1
3.1.2	What is Integrated Pest Management?.....	3-1
3.1.3	Integrated Pest Management Compliance	3-3
3.1.4	Integrated Pest Management Sheets	3-3
3.2	Current Pest Management Operations	3-3
3.2.1	General Household and Nuisance Pests.....	3-3
3.2.2	Grounds Maintenance	3-4
3.2.3	Structural Pests.....	3-4
3.2.4	Stored Product Pests	3-5
3.2.5	Health Related Pests	3-6
3.2.6	Invasive Species.....	3-10
3.2.7	Prohibited Operations and Devices.....	3-13
3.3	Regulatory Compliance.....	3-13
3.3.1	Policy	3-13
3.3.2	Pesticide Regulation and Enforcement	3-14
3.3.3	Laws and Regulations	3-14
3.4	Pesticide Management	3-15
3.4.1	Pesticide Selection	3-15
3.4.2	Pesticide Procurement.....	3-16
3.4.3	Pesticide Storage	3-16
3.4.4	Mixing.....	3-18
3.4.5	Application.....	3-18
3.4.6	Post-application Clean Up	3-19
3.5	Minimum Risk Pesticides	3-19
3.6	Canceled Pesticides	3-19
Chapter 4	—Health and Safety.....	4-1
4.1	Pesticide Applicator Safety	4-1
4.1.1	Potential Occupational Hazards.....	4-1
4.1.2	Hazard Abatement	4-3

4.2 Public Safety	4-5
4.2.1 Potential Hazards to Public.....	4-5
4.2.2 Hazard Abatement	4-6
4.2.3 Special Safety Considerations.....	4-7
4.3 Pest Control Accidents	4-8
4.3.1 First Aid	4-8
4.3.2 Medical Emergencies.....	4-8
Chapter 5—Environmental Considerations	5-1
5.1 Environmental Management System for Pesticides	5-1
5.1.1 Department of Defense Policy	5-1
5.1.2 What is an Environmental Management System?	5-1
5.1.3 Conformance of the Pest Management Program to the Environmental Management System.....	5-1
5.2 Environmental Considerations on the Pesticide Label	5-3
5.3 Managing Environmental Impact	5-3
5.3.1 Pesticide Pollution	5-3
5.3.2 Natural and Cultural Resources Protection.....	5-5
5.3.3 National Pollutant Discharge Elimination System	5-6
5.3.4 Spill Prevention and Management	5-7
5.3.5 Hazardous Materials and Hazardous Waste Management.....	5-7
Chapter 6—Emergency Pest Management	6-1
6.1 Public Health Emergencies	6-1
6.1.1 Natural or Manmade Disaster	6-1
6.1.2 Vector-borne or Zoonotic Disease	6-1
6.1.3 Animal Attack.....	6-1
6.2 Agricultural Emergencies	6-2
6.3 Emergency Pest Management Resources	6-2
Chapter 7—Program Resources	7-1
7.1 Naval Facilities Engineering Command, Pacific, Terrestrial Natural Resources Branch, Code EV22, Pearl Harbor, Hawaii	7-1
7.2 Navy Environmental and Preventive Medicine Unit SIX (NEPMU-6), Pearl Harbor, Hawaii	7-2
7.3 Navy Entomology Center of Excellence, Jacksonville, Florida	7-2
7.4 Hawaii Department of Agriculture	7-2
7.5 University of Hawaii Extension and Outreach Programs	7-3
Chapter 8—Integrated Pest Management Sheets	8-1
American Cockroaches	8-3

Cockroaches in Food Preparation Areas.....	8-7
Nuisance Ants	8-11
LittleFireAnt.....	8-15
Bed Bugs.....	8-19
Filth Flies.....	8-25
Fruit Flies.....	8-31
Drain Flies.....	8-33
Adult Mosquito Control	8-37
Larval Mosquitoes in Manmade Structures and Containers	8-41
Larval Mosquitoes in Permanent And Semi-Permanent Water Sources	8-45
Stored Product Pests in Food Storage Areas.....	8-49
Drywood Termites	8-53
Subterranean Termites.....	8-57
Stinging Insects.....	8-63
Spiders.....	8-67
Mites.....	8-71
Ticks.....	8-75
Rodents.....	8-77
Feral Cats.....	8-83
Fleas in and Around Buildings.....	8-85
Nuisance Birds.....	8-89
Snail and Slugs.....	8-95
Ornamental Plant Pests.....	8-99
Terrestrial Weeds.....	8-105
Invasive Weeds.....	8-109
Weeds in Right-of-Ways.....	8-115

Appendixes

Due to the size of the Appendixes they are found on the CD included with the IPMP.

A. Definitions and Abbreviations	A-1
B. Laws, Regulations, and Policies	B-1
C. Program Review.....	C-1
D. Pesticides.....	D-1
E. Contracts.....	E-1
F. Pest Operations.....	F-1
G. Environmental.....	G-1
H. Medical.....	H-1
I. Licenses and Certifications	I-1
J. Map of MCBH.	J-1
K. Emergency Vector Control Plan	K-1
L. Resources	L-1
M. AFPMB Technical Guides	M-1

EXECUTIVE SUMMARY

This Integrated Pest Management Plan provides a comprehensive, long-range document that captures all the pest management operations and pesticide-related activities conducted on Marine Corps Base Hawaii, which includes Marine Corps Base Hawaii Kaneohe Bay, Camp H.M. Smith, Puuloa Training Area, Manana Housing Area, Marine Corps Training Area Bellows, Waikane Impact Area, Pearl City Annex, and the Molokai Training Support Facility. It incorporates pest management practices and the local, state, federal and Department of Defense regulations conforming to the requirements of Department of Defense Instruction 4150.07, DOD Pest Management Program, and Marine Corps Order P5090.2A, Environmental Compliance and Protection Manual, while providing comprehensive information to installation staff and internal and external compliance auditors.

This plan was prepared by the Naval Facilities Engineering Command, Pacific, Applied Biology Branch from data collected through pest management data collection, on-site observations, interviews with installation personnel, and document reviews.

General pest control services for most of the installation are provided through an in-house pest control shop. Grounds maintenance is provided by a combination of commercial contractors and the in-house Pest Control, Custodial, Grounds and Labor shop. The main goal of the various pest control functions is to support the mission of Marine Corps Base Hawaii and tenant commands. Pest control services are also needed to:

1. Provide services that will prolong the life of the structures through subterranean termite and nuisance pest control
2. Maintain the safety and security of industrial and storage areas through vegetation control
3. Provide nuisance pest control to all buildings (except public-private venture housing) and outdoor areas to ensure a good working and living environment
4. Control weed and insect pests in all recreational and lawn areas to maintain aesthetics and provide recreational facilities to personnel
5. Provide control of mosquitoes, flies, and other potential disease vectors to ensure the comfort and well-being of all personnel
6. Provide vertebrate pest control, including rodent control, to all areas of Marine Corps Base Hawaii and tenant commands.

For the current level of work to be accomplished, a sufficient staff of qualified applicators must be maintained. Contract personnel must meet state certification requirements specified by contract. Performance assessment representatives/quality assurance evaluators must successfully take an initial pest management PAR course. To maintain their certification, the performance assessment representatives and Department of Defense pesticide applicators must successfully pass a Department of Defense pest management training and recertification course every three years. Pest control facilities must comply with current safety standards to provide a safe workplace and to minimize pesticide hazards.

The focus of this plan is on the safe, environmentally-sound, and cost-effective control of pests through integrated pest management. Integrated pest management depends on education, proper surveying and identification of pests; non-chemical and chemical control methods, and individual responsibility for pest prevention.
